One-day Workshop

Patricia Belyea

Make A Baby Quilt With Curved Templates Of Your Own Design

In the past, you may have bought a plastic template to make a certain quilt block. Now you can design and make your own curved templates for repeated blocks.

We start with the basics of making templates (from freezer paper!) and move to a confident approach for sewing curved seams (that are flat!).

The workshop project is a simple baby quilt filled with easy, repeated blocks—made with your own templates.

Sewing Tools and Supplies Needed

Sewing machine and gear—such as thread, ripper etc.

Fine pins (highly recommend Clover Fine Patchwork Pins #2507)

Good fabric scissors, paper scissors

Cutting tools—24" or larger cutting mat, 24" grid ruler, rotary cutter

Pencil; eraser; Prismacolor Premier colored pencils or fabric marking pens; fat Sharpie pen

Freezer paper

Iron and ironing board

Fabrics

Chose fabrics that contrast and that you want to work with. Gather three to five patterns and/or solids—1/2 yard each.

Hopefully you can find a small collection from your stash. For a baby, you may want to lean toward bold patterns and brightish colors.
